Location: Hooksett, NH

Duration: Contract to hire

Salary: Negotiable

Bachelor's degree in related Information Technology discipline: A MUST

Job Description:
We are looking for a smart and eager application developer to join our team of dedicated and experienced developers. In this role, you will gain significant experience with a consumer facing web application using industry standard best practices and latest tools and technologies.

You will work closely with the senior development staff as well as business analysts, user experience, quality assurance, and project manager gaining exposure to all phases of the software development life cycle.

Expectations:

- Complete assigned tasks as directed in a timely manner using good object oriented coding practices and standards.
- Unit test code for proper functionality
- Follow the established standards, patterns and process.
- Not afraid to seek guidance when needed to make good decisions
- Participate in team planning activities
- Enjoy software development

Qualifications:

- Bachelor's degree in Computer Science, Information Technology or a related discipline
- Recent College Grad or One to four years of solid, diverse work experience in application program development or equivalent in education and work experience
- Experience working with relational databases such as SQL Server/T-SQL (nice to have)
- Good knowledge of C#, HTML, CSS, and JavaScript
